

DAILY TRIPS - YEAR 2030

Notes:
The number of trips to and from a specific area depends primarily on how many residences, businesses, jobs, stores, schools, and recreational activities it has. This map shows the total estimated daily number of trips to and from each Traffic Analysis Zone for the year 2030.

A Traffic Analysis Zone (TAZ) is an area defined by natural or man-made boundaries and that is comparatively consistent within its boundaries in terms of zoning, land uses, and other socio-economic features.
