

**TABLE 3**

Comparison of CERCLA Municipal Landfill Application Presumptive Remedy Criteria with Conditions at Site LF01  
 EE/CA for Site LF01, Bellows AFS

Condition or Parameter	Presumptive Remedy Profile Value	Does Site LF01 Match the Presumptive Remedy Profile Value?	Comments
<b>Landfill</b>			
Future Land Use	No excavation of land for future land use will be required	UNCERTAIN	No excavation of land or future land use other than military training is expected in the future; however, other land uses cannot be discounted.
Type of Waste	Municipal or low-hazard military-specific waste	YES	Site LF01 contains primarily construction/demolition waste, municipal, and minor military waste.
Volume of Waste	> 100,000 cubic yards of waste	NO	Site LF01 contains approximately 13,000 cubic yards of waste. Based on this, the EPA guidance recommends that excavation be considered and must balance the long-term benefits of lower operation and maintenance costs and unrestricted land use with the high capital construction costs and potential risks associated with excavation.
