

TABLE 4

Summary of Comparative Analysis of Removal Action Alternatives for Site LF01
EE/CA for Site LF01, Bellows AFS

	Alternative	Effectiveness	Implementability	Estimated Duration	Estimated Cost (approx.)
1	No Action	Low	Moderate ¹	None	\$0
2	Soil/Landfill Materials Excavation and Disposal/Recycling	Moderate to High ²	Moderate	< 1 year	\$5,171,100
3	Soil/Vegetative Cover with Long-Term Monitoring of Groundwater	Moderate	Moderate to High	Up to 15 years	\$1,049,500

¹ This rating assigned because of the challenge of obtaining stakeholder acceptance of this alternative.

² Short-term effectiveness is low to moderate because of short-term exposure to potential hazards in landfill materials; also, no reduction in mobility or toxicity through treatment would be accomplished with this alternative.
