Public Comments**

**Aqua to Joliet**

- Some like alley with trail versus just trail because of distance from yard
- Water main and meters of west side of alley
- Trash pick-up in alley - okay with street pick up
- Like glass block as an element in the wall
- Prefer trail instead of concrete road
- Like look of sound wall along SH 47
- Like trail without alley but would like to see trail shifted further east
- Would prefer 'trail only' option even if trail can't be shifted east

**South of Joliet**

- Prefer to have wall further away
- Existing drainage problem from 24" x-culvert
- Existing "Hole" behind house
- Like sound wall
- Keep stacks on the steel mill
- Keep tunnel to the steel mill
- Shadowing effect of wall in morning was a concern
- With trail you may lose privacy
- Prefer extending trail south of Joliet

**Minnequa to Aqua**

- Must have alley
- Okay with park behind them
- Okay with trail behind them
- Understand the noise wall will not be built with modified alignment
- Understand the noise wall is on highway with existing alignment
